## PRO SKILLS

## PERSONALITY

“Judgements don’t stick because I’m forever evolving”

## SKILLS IN DEPTH

I started my journey back in 2010 building HTML and CSS websites for our businesses. In recent years my focus has been building on my passion for Frontend development with Javascript, Node.js, React and other frameworks. I would like a role where I can use my skills but also be able to grow and learn new languages / frameworks / techniques.

### JAVASCRIPT

Built websites / apps using the latest javascript ES6 techniques. Proficient in DOM manipulation, OOP / functional programming approaches, REST Api's.

### CSS3

Proficient in basic - advanced techniques including variables, animations, transitions, SCSS, LESS,

### WORDPRESS

Connected plugins/customized to create complex websites and customized with HTML and CSS.

### REACT

Built websites / web apps using classes, hooks. Apps include Youtube clone and a Whatsapp clone using Socket.io (Below)

### HTML

Proficient in basic - advanced techniques. No tables unless absolutely necessary!

### PHP

Basic knowledge and used in previous job role to build out web pages in PHP

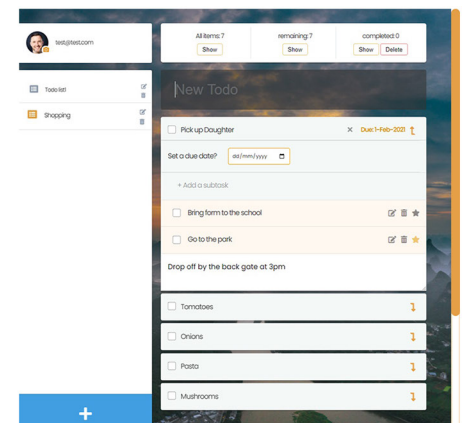

## EXAMPLE PROJECTS (Taken from my portfolio site)

### TODO APP (HTML, CSS, Vanilla JS)

Features:

Multiple todo lists, todo items, subtasks, due dates, add a note, view all/remaining/completed todos, delete completed, reorder drag and drop, item, delete todo list, edit todo/list names, add favorite subtask, create account, edit email, upload profile pic, mobile responsive.
