

ROBERT GREGG

Front End Web Designer/Software Engineer

I have a passion for coding and have enjoyed working on a wide range of projects. My past experience is mainly in front end development however I enjoy learning the new skills required in every project. I enjoy both being a part of a synergistic team and/or working alone.

I also have 15 years of experience in many other areas of business: marketing, communications, customer service, content creation, graphics design/video production/podcast production and more.
